

Charging Cable Manual

Sinox EV Charging Cables

How to use mode 3	
	 Female plug
	 male plug
	<p>1 You start a session at a charging point using a registered RFID card. To start a session, hold your RFID card in front of the RFID symbol beneath the display on the front of the charging point.</p>
	<p>2 After successful authorization the charging point is ready and the sockets are opened. Plug your charging cable into either the right or the left side.</p>
	<p>3 Now connect your charging cable to your EV.</p>
	<p>4 As soon as the connection between the vehicle and the charging point is established, the charging cable will be locked and the charging process will start.</p>
	<p>5 You can end the charging process by again holding your RFID card in front of the RFID symbol. The plug will be unlocked.</p>
	<p>6 The plug attached to the EV can now be pulled out.</p>
	<p>7 Pull the plug out of the charging point.</p>

Ladekabel manual

Sinox EV ladekabler

Brug af ladekabel	
	 <p>Hun stik</p>
	 <p>Han stik</p>
 <p>1</p>	Du starter en session ved en ladestander ved hjælp af en registreret ladebrik. For at starte en session skal du holde din ladebrik foran symbolet under displayet på forsiden af ladestanderen.
 <p>2</p>	Efter godkendelse er ladestander klar og stikkene åbnes. Sæt dit opladerkabel i.
 <p>3</p>	Tilslut nu dit opladningskabel til din EV (bil).
 <p>4</p>	Så snart forbindelsen mellem køretøjet og ladestander er etableret, låses opladerkablet og opladningsprocessen starter.
 <p>5</p>	Du kan afslutte opladningsprocessen ved igen at holde din ladebrik foran symbolet. Stikket låses op.
 <p>6</p>	Stikket til EV (bil) kan nu trækkes ud.
 <p>7</p>	Træk stikket ud af ladestanderen.
