Changing the Display Information Screen

Changing the DAB display information

If the Monty is in DAB mode, press and hold the **OK** button to select different information screens to show on the display, continue pressing and holding in short bursts to cycle through different information screens such as Signal Strength, Program Type, Station Name/Region, Frequency, Signal Error, Data Rate, Power Type (battery charge %), Date and Radio Text
Please note when you change channel or turn the radio off the screen will revert to Radio Text.

Changing the FM display information

If the Monty is in FM mode, press and hold the **OK** button to select different information screens to show on the display, continue pressing and holding in short bursts to cycle through different information screens such as Program Type, Frequency, Stereo/Mono, Power Type (battery charge %), Signal Strength, Date and Radio Text
Please note when you turn the radio off the screen will revert to Radio Text.

Troubleshooting

Make sure that your Monty is connected to the mains power.

To use the features in the Menu button, your radio needs to be turned on by pressing the ⊚ button.

Make sure that you have connected the cable to the correct power socket on the rear of your Monty. The power socket is on the right next to the USB socket.

If using away from mains – has the Monty battery run out of battery power? Try recharging.

If you experience a fault with the radio, you may be advised to complete a factory reset, this will clear the memory of the radio and restart the product.

Factory Reset

Please Note: - After a factory reset your preset stations will need to be re-saved.

1. Turn the radio on.

2. Press **Menu**.

3. Use the **< & >** buttons to navigate to Reset.

4. Press **OK** button to confirm.

5. Use the **< & >** buttons to change to Yes.

6. Press **OK** button to confirm.

7. The radio will then reboot - all settings will be wiped, a first-time scan will be performed.
